Special Editions of ONYX RIP Software Provide a Complete Print & Cut Solution Optimized for the HP® Latex 300 Series

HP Print & Cut Editions of the ONYX RIP software provide the control and simplicity needed to unify the print and cut process, helping print providers reduce overhead costs. Print operators will find it easy to manage multiple devices in a production environment while automating routine tasks that will reduce errors and minimize waste. HP Print & Cut Edition software, based on the proven ONYX 11 platform, provides print shops an all-inclusive suite of tools required to produce a wide range of applications.

Simple

- *Simplify your workflow with easy to use tools for printing and cutting with fewer clicks*
- *Custom cutting workflows with ONYX Quick Sets saves you time by automating repetitive tasks*
- *Efficiently manage multiple devices with the powerful combination of RIP-Queue and CUT-Server*
- *Cut setup is easy using the new cutting palette for Adobe® Illustrator®*

Innovative

- *Click-free media synchronization for the HP Latex 300 series eliminates the need to manually manage printer profiles*
- *Optimize your media usage by automatically nesting jobs together based on your print and cut application*
- *New cut-only workflow let you cut directly from CUT-Server without the extra step of printing*

Proven

- *All ONYX products include this complete print & cut solution without the need to purchase additional add-ons*
- *Print brighter and more vibrant images with proven color technology by ONYX*
- *Since 1989, ONYX has been innovating superior printing software, providing predictable, high quality print output*
